GitHub: https://github.com/zemchuks

Software Engineer with over a year of programming experience, a track record of successful personal projects, and experience in Front-End development processes. I build web apps with Front-End technologies like ReactJS and Materialize CSS. With strong technical skills as well as excellent soft skills, I'm hoping to join an innovative and dynamic company, develop my skills and help educate techies and beginners aspiring to join the tech world.

Skills

- Creating Intuitive User Interface
- Problem solving
- JavaScript Software Developer
- Web development Frameworks
- Project support, Technical Writing.

Work History

2019-06 – 2019-08

Internship Student
Andela, Lagos.

- Developed a Bus Transportation booking server that enables registered users to book a trip and a bus. This shows a variety of locations and buses to travel to and from with style.
